COURSE NUMBERS SAF-LOG103 & SAF-LOG101

GUARDLOGIX FUNDAMENTALS, TROUBLESHOOTING & APPLICATION DEVELOPMENT

TRAINING EVENT

This is a three-day course designed for individuals who need to monitor, troubleshoot and develop Logix Designer projects and hardware for GuardLogix controllers. This course will assist you in developing and building a solid foundation with a fundamental knowledge of a GuardLogix® system. Upon completion of this course, you will be able to create a Logix Designer project for a GuardLogix® system, as well as efficiently troubleshoot a previously operational GuardLogix® system. You will have the opportunity to develop and practice these skills by learning basic GuardLogix concepts and terminology, by troubleshooting a GuardLogix project, creating and configuring a GuardLogix project, adding and configuring CompactBlock™ Guard I/O™ safety modules, generating Safety Signatures and locking/unlocking a GuardLogix controller, and programming safety instructions.

This course awards 2.1 IACET CEUs.

+ HANDS-ON

Throughout this course, you will have the opportunity to practice the skills you have learned through a variety of hands-on exercises.

COST

\$2,124
Includes lunch
each day

REGISTER

To register, contact Erica Masterson at emasterson@smcelectric.com by Tuesday, June 5.

COURSE NUMBERS SAF-LOG103 & SAF-LOG101

Prerequisites

To successfully complete this course, the following prerequisites are required:

- Ability to perform basic Microsoft Windows tasks
- Understand international machine safety standards
- Completion of the Studio 5000 Logix Designer Level 1: ControlLogix System Fundamentals course (Course No. CCP146), Studio 5000 Logix Designer Level 2: ControlLogix Maintenance and Troubleshooting course (Course No. CCP153), and Studio 5000 Logix Designer Level 3: Project Development course (Course No. CCP143) or equivalent experience with Logix Designer application
- General experience with industrial controls

SCHEDULE

Day 1

- Understanding GuardLogix Controller Safety Operation
- Identifying GuardLogix System Hardware Components
- Identifying GuardLogix Project Components
- Downloading and Uploading a GuardLogix Project
- Troubleshooting GuardLogix Controller Components
- Troubleshooting and Replacing GuardLogix CompactBlock Guard I/O Safety Modules

Day 2

- Creating a New GuardLogix Project Using the Logix Designer Application
- Configuring CompactBlock Guard I/O Safety Modules for a GuardLogix Project Using the Logix Designer Application
- Configuring a GuardLogix Controller to Produce/Consume Safety Data over an EtherNet/IP Network
- Getting CompactBlock Guard I/O Point Status Information Via Explicit Messaging Using the Logix Designer Application
- Configuring GuardLogix Controller Safety Options

Day 3

- Programming a Dual-Channel Input Stop Instruction
- Programming a Dual-Channel Input Stop with Test and Mute Instruction
- Programming a Configurable Redundant Output Instruction
- Programming a Five Position Mode Selector Instruction
- Programming a Safety Mat Instruction
