## FACTORYTALK VIEW SE PROGRAMMING

# TRAINING EVENT

This course is designed for individuals who need to develop develop FactoryTalk View SE local (stand-alone) or network distributed applications. Upon completion of this course, you should be able to organize and develop FactoryTalk® View Site Edition (SE) applications.

This course provides opportunities for you to work with local FactoryTalk View SE applications. During class, you will have the opportunity to practice the skills used to create an application and build graphic displays.

You will learn how to configure alarms and security, trend data, and test your application using a FactoryTalk View SE Client. You will also work with RSLinx Enterprise communications software and the FactoryTalk Diagnostics system.

### + HANDS-ON

Throughout this course, you will have the opportunity to practice the skills you have learned through a variety of hands-on exercises.

### COST

\$2,475  
Includes lunch  
each day

### REGISTER

To register, contact Erica Masterson at [emasterson@smcelectric.com](mailto:emasterson@smcelectric.com) by Monday, August 20.

# COURSE NUMBER CCV207

---

After practicing these skills in a local station application, you will receive a high-level overview of how a network distributed application is created.

This course will award 3.2 CEUs.

## Prerequisites

To successfully complete this course, experience operating a personal computer within a Microsoft Windows 7 environment is recommended.

## SCHEDULE

### Day 1

- Getting Started with FactoryTalk View SE Software
- Creating and Configuring a Local FactoryTalk View SE Application
- Creating a Graphic Display and Adding Basic Objects in a FactoryTalk View SE Application
- Configuring Global Objects and Global Object Parameters in a FactoryTalk View SE Application
- Adding VBA Display Code in a FactoryTalk View SE Application

### Day 2

- Adding Interactive Objects to a Display and Creating a FactoryTalk View SE Client
- Animating a Graphic Display in a FactoryTalk View SE Application
- Creating and Managing HMI Tags in a FactoryTalk View SE Application

### Day 3

- Creating, Modifying, and Viewing a Data Log Model in a FactoryTalk View SE Application
- Creating Trends and Trend Overlays in a FactoryTalk View SE Application
- Using Tag Placeholders in a FactoryTalk View SE Application

### Day 4

- Creating a Derived Tags File and an Event File in a FactoryTalk View SE Application
- Creating Keys, Macros and Symbols in a FactoryTalk View SE Application
