COURSE NUMBER CCP298
**STUDIO 5000 LOGIX DESIGNER LEVEL 1:
COMPACTLOGIX FUNDAMENTALS AND
TROUBLESHOOTING**

TRAINING EVENT

This course is designed for individuals who need to maintain and troubleshoot a CompactLogix system – but have no current working experience with CompactLogix systems. Upon completion of this course, you should be able to troubleshoot a previously operational CompactLogix™ system and restore normal operation. All Logix5000™ systems use the same control engine; therefore, tasks are similar. You will see applicable references for other systems.

You will have the opportunity to develop and practice these skills by:

- Learning basic concepts and terminology used with
 - CompactLogix system hardware
 - Studio 5000 Logix Designer® application
- Practicing a systematic strategy for diagnosing and troubleshooting problems
 - Configuration issues
 - Electrical noise
 - Faulty/malfunctioning field devices
 - Controller I/O or other hardware issues
- Performing hands-on exercises

This course will award 3.2 CEUs.

+ HANDS-ON

Throughout this course, you will have the opportunity to practice the skills you have learned through a variety of hands-on exercises.

COST

\$2,995
Includes Lunch

REGISTER

To register, contact Brandy Meeker at bmeeker@smcelectric.com by Monday, Jan 21

SCHEDULE

- Locating CompactLogix Components
- Navigating through the Studio 5000 Logix Designer Application
- Connecting a Computer to a Communications Network
- Downloading and Going Online
- Locating I/O Tags and Devices
- Interpreting Logix Designer Project Organization and Execution
- Interpreting Ladder Logic Structure
- Locating and Editing Tag Values
- Interpreting Bit Instructions
- Interpreting Frequently Used Instructions
- Interpreting Arrays
- Interpreting Tags of User-Defined Data Types
- Searching for Project Components
- Integrated Practice - Interpreting a Basic Project
- Forcing I/O and Toggling Bits
- Troubleshooting Digital I/O Problems
- Troubleshooting Analog I/O Problems
- Troubleshooting Banked Local I/O and Distributed I/O Problems
- Updating Logix5000 Firmware
- Troubleshooting Controller Problems
- Troubleshooting Power Supply Problems
- Analyzing and Troubleshooting a System Using a Trend Chart
- Integrated Practice-Troubleshooting Basic Projects
- Editing Ladder Logic Online
- Managing Logix Designer Project Files
- Documenting and Printing Components
- Troubleshooting Noise-Related Problems
